

STELLENIUM METAL WORKS

www.stelleniummetal.com

ABOUT US

We are a specialized metal fabrication and finishing company based in Abu Dhabi, providing high-quality steel, stainless steel, and aluminum solutions. Our work is driven by engineering precision, advanced manufacturing techniques, and strict compliance with approved specifications and industry standards.

Supported by an experienced management team, qualified engineers, and skilled craftsmen, all works are executed in our fully equipped factory in Mussafah Industrial Area. We are committed to safety, quality, and timely delivery, offering durable and professionally finished solutions tailored to client needs.

FUAD HAMADAH

Fuad Hamadah is a seasoned professional with over 20 years of experience in corporate and financial management. Known for his strategic vision and strong operational oversight, he has played a key role in driving organizational growth, ensuring financial stability, and maintaining high standards of professionalism across all aspects of business operations.

Mr. Fuad Hamadah - Director

Our Mission

Our mission is to deliver high-quality metal fabrication and finishing solutions that enhance durability, performance, and aesthetic value. We are committed to excellence through skilled workmanship, advanced techniques, and strict quality control, while building long-term relationships based on trust, reliability, and customer satisfaction.

Our Vision

Our vision is to become a trusted and leading metal works company, recognized for innovation, quality, and safety excellence. We aim to continuously develop our capabilities, adopt modern technologies, and exceed client expectations by delivering sustainable and value-driven metal solutions.

Core Services

01

Internal Staircases & Railings

Fabrication based on detailed engineering drawings and calculations to meet the highest safety and quality standards.

02

Steel Doors

Custom design and fabrication of steel doors in accordance with approved engineering specifications, ensuring strength, security, and durability.

03

Handrails

Supply and installation of handrails in various materials and designs, compliant with project approvals and client requirements.

Core Services

04

Structural Steel Works

Execution of steel structures for annexes and construction projects, strictly following approved drawings and calculations.

05

Stainless Steel Works

High-quality stainless steel fabrication for handrails and decorative elements with premium finishing.

06

Steel & Aluminum Pergolas

Design, fabrication, and installation using high-grade materials for durability and aesthetic appeal.

Factory & Operational Capabilities

Factory Location

Mussafah Industrial Area, Abu Dhabi (Sector 38), with a spacious layout designed for efficient workflow.

Integrated Coating Department

Equipped with advanced facilities and managed by a specialized technical team.

- Powder Coating
Complete powder coating ovens delivering durable, corrosion-resistant, and high-quality finishes.
- Epoxy Painting
Professional epoxy application ensuring superior protection and long-lasting performance.

All manufacturing and finishing works are carried out in a fully equipped industrial facility.

Specialized Finishing & Coating Division

Beyond fabrication, we offer integrated metal finishing solutions.

Powder Coating

Durable, rust-resistant coatings with long-lasting color quality.

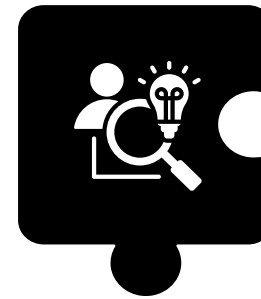

Epoxy Coating

Specialized solutions suitable for demanding environments requiring high chemical and mechanical resistance.

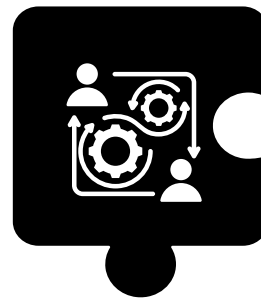

Competitive Advantage

We stand out through our deep technical knowledge and manufacturing precision.

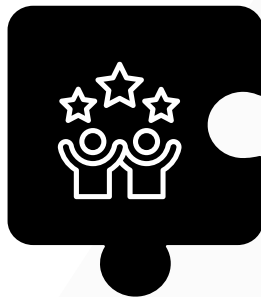

Advanced Metal Expertise

In-depth understanding of steel, stainless steel, and aluminum properties to ensure optimal material selection.

Engineering Precision

Utilization of modern machinery and strict quality control throughout cutting, welding, and fabrication processes.

Standards & Compliance

All works are executed according to approved engineering standards and structural safety requirements.
